

Telegraphic Address—
BARR, COVENT GARDEN, LONDON

AUTUMN 1901

BARR'S Gold Medal DAFFODILS

*Awarded 13 Gold Medals, 33 Silver-Gilt Medals, 143 Silver Medals,
5 Silver Cups, and many Special Prizes, Certificates of Merit, etc.*

Daffodils naturalised in Grass (copyright)

BARR & SONS,
11, 12 & 13 King Street, Covent Garden, London

Nurseries—LONG DITTON, SURREY, a few minutes from SURBITON STATION (S.W.R.).
Visitors invited to the Nurseries during Spring, Summer, and Autumn to see BARR'S FAMOUS DAFFODILS,
IRISES, PÆONIES, SUNFLOWERS, MICHAELMAS DAISIES, and other HARDY HERBACEOUS, ALPINE,
and BULBOUS PLANTS. The Rock and Aquatic Gardens are also worth a visit.

Entered at Stationers' Hall.

[All rights strictly reserved.]

BARR'S DAFFODILS.

THE FAVOURITE HARDY FLOWERS OF SPRING.

DAFFODILS are the most graceful and beautiful of all Hardy Spring Garden Flowers, and withstand uninjured our severest winters better than any other flower. The cut blooms are always acceptable, and are in abundance out of doors at a season when other flowers are scarce. They supplement and associate admirably with hot-house flowers.

We have received the following HIGHEST AWARDS for our EXHIBITS OF DAFFODILS, Spring 1901.

N. JOHNSTONI KING AND QUEEN OF SPAIN.

- March 12. SILVER MEDAL (Highest Award), R.H.S., London.
- „ 26. SILVER MEDAL (Highest Award), R.H.S., London.
- April 9. SILVER-GILT MEDAL (Highest Award), R.H.S., London.
- „ 10. GOLD MEDAL and First Prize, Shrewsbury.
- „ 15. SILVER MEDAL (Highest Award), Brighton.
- „ 18. GOLD MEDAL and First Prize (Ten Guinea Challenge Cup), Manchester.
- „ 23. SILVER-GILT MEDAL (Highest Award), R.H.S., London.
- „ 24. SILVER MEDAL (Highest Award), R.B.S. London.
- „ 25. SILVER-GILT MEDAL (Highest Award), Midland Daffodil Society, Birmingham.
- „ 25. SILVER-GILT MEDAL (Highest Award), R.H.S., Birmingham.

Numerous AWARDS and FIRST-CLASS CERTIFICATES have also been given to individual varieties.

PRESS NOTICES OF BARR'S DAFFODILS.

Extract from "The Daily Telegraph," April 24th, 1901.

"Three weeks ago holiday-makers travelling to the sea by the South-Western Railway missed a most prominent and accustomed landmark in the journey. Just beyond Surbiton Station the traveller has grown to expect a blaze of golden colour, stretching far away in the distance. But at Easter this year there was little else to indicate the coming of the daffodil, the king of the spring, than long stretches of æsthetic green blades. Early last week, however, the cold east winds ceased, and permitted the buds to assert themselves. Coaxed to the fulness of their glory, the daffodils at Messrs. Barr's nurseries have now reached the zenith of their short existence.

"Most Londoners are familiar with the Long Ditton nurseries, whose autumn catalogues are certain each year to embrace several novelties. Lord Roberts, a much prized and magnificent flower, this spring takes pride of place. 'Bobs' is not yet on the market, but his owners presented him at the Royal Horticultural Society's Show yesterday for a certificate. Twenty-five guineas will be asked for each bulb of this particular bloom when next autumn it is catalogued, but just now it grows in its first regal splendour at Long Ditton alone.

"That there are daffodils and daffodils is here too forcibly pressed home, for the uninitiated are lost in a wilderness of shades, varying from palest primrose to deepest orange, and embracing every tone of apricot and lemon. Four times since February Messrs. Barr have taken the highest awards for daffodils at the Royal Horticultural Society's Show, and at Shrewsbury, Truro, Manchester, and Brighton they have won the highest distinction."

Extract from "The Westminster Gazette," April 24th, 1901.

"A GARDEN OF ENGLAND."

"The sudden bursting in upon us of a late spring has put the parks and gardens in and around London within the space of a single week into a green, flower-embroidered gown of marvellous freshness. The pear and plum trees are wrapping themselves in the lace veils of their white blossom, and beneath them everywhere the golden trumpets of the daffodils are held up. A walk through the park shows what beautiful effects can be obtained by the massing together of these, the finest of spring flowers. But even the parks are as nothing compared to the sight which just now may be seen in the Bulb Gardens at Long Ditton, where Messrs. Barr and Sons have some millions of daffodils in full bloom. A fortnight ago the grounds looked bare and wintry; one day a twinkling as of the first stars in the evening sky was noticed as here and there a clump of daffodils began to flower. Next day thousands and tens of thousands of buds blossomed out, and just now and for the next week these twenty acres of green and gold will be one of the most attractive corners in rural England. There are single beds in which ten thousand yellow daffodils are all turning their heads to the sun. There are daffodils so large that the ordinary wild daffodil of the northern fells and woods looks a veritable pigmy by their side. Of these we may mention the splendid '**Emperor**,' '**Sir Watkin**,' '**Lord Aberdeen**,' and many others. Again, there are new daffodils, worth twenty guineas a root; '**Peter Barr**' is one of these, named after the venerable founder of the firm, who has spent a long life in searching for new varieties of daffodils, and has preached the gospel of beauty, as represented by the narcissus, for over sixty years. One of the latest additions to Messrs. Barr's collection of six hundred varieties of daffodils is a large, clear yellow flower, '**Lord Roberts**,' and another quaintly pretty flower, is the '**Apricot**,' the trumpet of which is of a delicate apricot tint. We note, in connection with Messrs. Barr's output of narcissi, that not only have they added *two gold medals* this season to their 'honours,' but that at nearly every important spring flower show *they have received the Royal Horticultural Society's highest award.*

"One of the most fascinating spots in this fascinating flower garden is that where a gurgling stream winds through a rock garden, where all manner of sprouting things promise a blaze of flowers. The kingcups and marsh marigolds are already out, and of daffodils there are whole colonies, which, nodding at their own reflection in the water, remind one of the ancient myth of Narcissus the beautiful, who, for his vanity, was turned into the flower to which his name has clung ever since.

"It is no wonder there are, or seem to be, more birds singing around this golden garden in Surrey than anywhere else, for no other piece of ground can equal this, which lies among the orchards and pasture-lands, for unique loveliness. Anyone who likes to go and see this 'show' can do so in half an hour's time by taking a train from Waterloo to Surbiton, and visitors are always made welcome in this wonderland of spring flowers, which reminds you of Haarlem and Leyden when the famous Dutch bulb gardens are in flower. But Holland has only dunes for a background to its bulb gardens, while down at Long Ditton they are only a part of a county in full bloom."

Extract from "The Gardener's Chronicle," May 4th, 1901.

"DAFFODILS, EARLY AND LATE."

"The nurseries presented such breadths of yellow colour of many shades, that it would be idle to attempt a description of the scene, unless the standpoint be from the comparative degree; and we say that of the many fine displays we have seen at Messrs. Barr & Son's establishment, this was the richest. But there is a very obvious disadvantage attending such a prodigal display, for we have to make up our minds to a very short season of bloom; and Herriek's lines will be unusually appropriate—

"Fair Daffodils! We weep to see
You haste away so soon."

"There was little time to be lost in moralising, however, for visitors were entering at every gate to see the fleeting picture, and so with Mr. Barr we hurried off to see the expensive treasures that at present are carefully protected from damaging winds by lath-made walls. On our way there was the pretty little *Narcissus triandrus albus*, upon some stonework. The double-white *Arabis* near to it, also upon some stonework, was flowering very strongly; it is a capital plant, and as many hardy plant growers may not have obtained it yet, our note may be useful. By this time our attention was directed to the fine new yellow trumpet *Daffodil King Alfred*, already seen at some of the exhibitions; *Weardale Perfection*, a superb bi-coloured trumpet, still very rare; and the lovely pale-coloured *Madame de Graaff*, with an ample rim to the trumpet, and which is not surpassed by any modern variety of the same type. All these have been figured in our columns. Messrs. Barr's new variety of the *Poet's Narcissus 'Glory'* is a very fine one, being large in size, unusually pure in its whiteness, and having a richly coloured crown. A new white trumpet *Daffodil* of large size has been named after *Peter Barr*, who at the age of seventy-five has just left the New Hebrides, and hopes to travel from Cape Town to Egypt by land, beside having many other adventures before coming home. Next was *Lord Roberts*, the new yellow trumpet variety already referred to in these columns; it has short, broad, somewhat pale-coloured segments, and rich trumpet with good lip. *N. Leedsii 'Maggie May'* is a delightful flower, and although we have seen it many times, may not be described as common whilst the bulbs remain at the price of twelve to fifteen guineas! *Incomparabilis Gloria Mundi* has a very rich orange-coloured cup; and *Gloria of Leiden*, which is the last of the rarities we will mention, might almost be termed a 'starer,' for its bold, rich, yellow trumpet does not 'nod,' but looks upward.

"We can only dwell momentarily among the beds out of doors, however much we would like to do so. *Stella superba*, a bicolor of the incomparabilis section, was marvellous, and Mr. Barr says it is a capital grower; *Duchess of Westminster (Leedsii)*, *John Bain (Burbidge)*, very suitable for naturalising in grass; *Frank Miles*, excellent for the same purpose, owing to its pretty 'winged' appearance; the well-known *Emperor* and *Empress*; *Mrs. Langtry (Leedsii)*, with a yellow ring on the cup; *Ray Smith*, a yellow trumpet variety, with broad, glaucous foliage; *Hume's Giant*, and *Victoria*, were among the most noteworthy varieties in this extensive collection. *Victoria* is not only one of the new and valuable trumpet varieties, but it is very suitable for forcing purposes, being earlier than *Horsfieldi*, and following *Golden Spur*. Then there is *Lucifer*, an incomparabilis variety, raised by Mrs. Lawrenson; its rich, orange-scarlet-coloured cup is one of the most remarkable developments of colour in the whole genus *Narcissus*.

"We cannot close this note without a reference to the gorgeous *Tulips*, including *T. Greigii*, that helped to make the nurseries so gay; nor the *Hyacinths*, and especially the *Grape Hyacinths*, that formed such panels of blue. Such a graceful scene as *Muscari conicum* (Heavenly Blue) makes upon a hedge-bank which has been planted with this variety, is one that must remain ever in our memory."

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

SOIL AND ITS TREATMENT.—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather moist loam. When the soil is of a dry and sandy nature, it should be deeply dug, rotten stable manure should be added, and a potato or other crop taken off before planting. If this is not convenient, then place the manure at least 12 inches deep, so as to be out of the reach of the bulbs; the manure is used not as a stimulant but as a sponge to hold moisture in the soil. The ammoniacal properties of manure are injurious to the Daffodil, hence great care is necessary in the use of it.

Freshly dug Soil should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are often drawn under considerably below their proper depth, and the bloom in consequence is weakened and retarded.

Best and Safest Manure to use is Crushed Bones or Basic Slag (*for price see page 27*). This should be applied at planting time, and may be mixed with the soil or placed next the bulbs; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or $1\frac{1}{2}$ oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or $7\frac{1}{2}$ oz. to the square yard. We recommend for light soils Crushed Bones (providing they are genuine) in preference to Basic Slag. On very poor and DRY SANDY SOILS we recommend in addition SULPHATE OF POTASH (*for price see page 27*), to be sprinkled annually in the autumn over the surface of the ground, after planting, at the rate of 2 cwt. to the acre, or about $\frac{3}{4}$ oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold moisture in the soil, a condition so essential to the perfect development of the Daffodil. We also recommend the use of Phytobroma in autumn and spring (*see particulars, page 27*).

In Early Spring, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains.

PLANTING AND LIFTING.—The best time to plant, to obtain the finest flowers, is during August and September, *although bulbs may be planted as late as Christmas with very satisfactory results.* (Mr. William Robinson has planted Daffodils at Gravetye as late as February, and they have bloomed well.) The bulbs may be left undisturbed for years in ordinary good loamy soils, but on poor and light soils they are better lifted every two years, as soon as the foliage has died down, and replanted as early as is convenient. Never plant when the ground is wet and sticky; wait until it is dry or friable. Do not put silver sand around the bulbs of Narcissi except in the case of *N. corbularia*.

Depth to Plant.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of 2 to 3 inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be *covered with soil once and a half its own depth*, measuring the bulb from the collar of its neck to its actual base. (*See page 26 for BARR'S SPECIAL BULB PLANTER.*)

POSITION AND GROUPING FOR EFFECT.—All Daffodils prefer partial shade, although most of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by a *. In the flower border, to obtain the best effect, Daffodils should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping Daffodils the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period, by a judicious arrangement, a constant succession of flower is obtainable. In the following pages we denote the rotation of blooming. (*See page 12*).

NATURALISING DAFFODILS IN GRASS.—All Daffodils may be planted in grass with perfect success. To produce the best effect, the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor Poet's Narcissi with the Star Narcissi. In arranging, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and planting them where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are never found in nature.

Varieties specially Suitable for Naturalising in Grass, Woodlands, etc.—These are all free seeders, and will therefore spread naturally; they are mostly wild plants—*Abcissus*, *Achilles*, *Countess of Annesley*, *Golden Spur*, *Henry Irving*, *Obvallaris*, *Spurius*, *English Lent Lily*, *Princeps*, *Scoticus*, *Variiformis*, *Albicans*, *Pallidus Præcox*, *Moschatus* of Haworth (very pretty in grass), and all varieties of *Poëticus*. THE VARIETIES UNDERLINED we do not recommend for the cultivated border, as they deteriorate the second year, while in grass or meadowland they flourish.

Method of Planting Daffodils in Grass.—We recommend for this work our SPECIAL BULB PLANTER (*see illustration, page 26*), which we have much pleasure in introducing this season. By the use of this implement the trouble of planting bulbs in grass is reduced to a minimum. It takes out a clean, circular little sod of turf 2 inches in diameter, and of sufficient depth. On making the second hole this piece of turf is released from the planter and lies ready on the ground to cover the bulb with. The soil is not in any way tightly pressed and made hard, which is the case when an ordinary dibber is used, and the appearance of the grass is not spoilt; in fact, after planting 10,000 bulbs with this tool on a greensward, one could not detect that the grass had been touched. If the ground is very poor and thin, a compost of fresh soil with an abundance of *Crushed Bones* (7 lbs to a bushel) should be made and dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the sod of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots of the trees come close to the surface. (*For price of Barr's Special Bulb Planter, see page 26.*)

CULTURE OF THE DAFFODIL IN POTS AND BOWLS, Etc., FOR INDOOR DECORATION.

DAFFODILS GROWING IN A BOWL OF
COCOA FIBRE.

Of the stronger growing sorts use three to six bulbs, according to size of bulb, for a $4\frac{1}{2}$ to 6-inch pot; of the small growing kinds, such as *N. Minimus*, *Nanus*, *Minor*, *Cyclamineus*, *Triandrus*, *Juncifolius*, and *Corbularias*, use twelve to eighteen bulbs for a $4\frac{1}{2}$ to 6-inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may easily be had in bloom in January:—*N. Minimus*, *Minor*, *Nanus*, and *Cyclamineus*, and these may be mingled with *Chionodoxas*, as both bloom at the same period and produce a charming contrast. The *White Hoop Petticoat Narcissus* should be potted in almost pure sand kept well moist, and may be had in bloom shortly after Christmas. (See *Rock Garden Collections of Miniature Daffodils*, page 7.)

All Daffodils may be grown in pots, but in the following pages we have indicated thus † those kinds which are best for this purpose.

If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes five to six inches deep, and only just cover the bulbs with soil. The pots or boxes should then be placed out of doors on a firm bottom, such as a bed of ashes or a gravel path, and be covered with six inches of ashes or cocoa-nut fibre. When the bulbs have filled the pots or boxes with roots and made an inch or two of top growth, portions should be removed indoors in succession, selecting first those which flower naturally early. First place in a cold frame or cool greenhouse, and when the flower buds are well advanced shift to a slow forcing house, when they should have abundance of water and plenty of air. The plants should be kept as near to the glass as possible, and not allowed to get drawn from an insufficient supply of light or air. On no account should bottom heat be given.

A charming effect is obtained by growing Daffodils in fancy bowls (see *Illustration*), simply using cocoa fibre or our Special Mixture of Cocoa Fibre and Charcoal ($3/6$ per bushel, $1/-$ per peck). Fill the bowls one-third up with fibre, then insert the bulbs and fill up nearly to the top with fibre. Give sufficient water to make the whole firm, and after that simply keep the fibre moderately damp. Daffodils may be grown successfully in this way in a cool greenhouse or sitting-room window (by preference a room without a fire). They should be grown cool, and not brought into warmth until the flower buds are colouring. For price of suitable bowls for this purpose, see page 27.

ON CUTTING DAFFODILS FOR DECORATION.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud has well broken, and is expanding from the spathe. Place in water and allow the flowers to open in a cool greenhouse or sitting room. The blooms opened in this way are larger than those which develop out of doors.

DAFFODIL COLOURED PLATES.

These Daffodil Plates can be had, post free, at the following charges:—

- (A) Two large Uncoloured Illustrations, one representing a group of Yellow Trumpet Daffodils, and the other a group of White Trumpet Daffodils, drawn and arranged for the "*Gardeners' Chronicle*" by Agnes Barr. The two Plates for 1s.
- (B) Coloured Plate of Daffodils, representing *Incomparabilis Gloria Mundi*, *Incomparabilis Princess Mary*, and *Leedsii Beatrice*. 1s.
- (C) Coloured Plate of Daffodils, representing a group of *Poëticus* and *Burbidgei* varieties. 1s.
- (D) Coloured Plate of a group of Daffodils, including *Cernuus pulcher*, *Johnstoni Queen of Spain*, *Bicolor J. B. M. Camm*, *Leedsii Superbus*, *Nelsoni* varieties, etc. 1s.
- (E) Coloured Plate of a group of Daffodils, including *Barrii conspicuus*, *Triandrus albus*, *Leedsii*, *Mrs. Langtry*, *Bicolor J. B. M. Camm*, *Johnstoni Queen of Spain*, *Cyclamineus*, and *Minimus*. 1s.
- (F) Coloured Plate of a group of Barr's beautiful new Daffodil "*Queen of Spain*." 6d.
- (G) Coloured Plate of Daffodil *Incomparabilis Sir Watkin*. 6d.
- (H) Coloured Plate of Daffodils *Madame de Graaff* and *Apricot*. 6d.
- (I) Coloured Plate of Daffodils *Weardale Perfection*, *Monarch*, and *Lutworth*. 6d.

A COMPLETE SET OF THE ABOVE PLATES SENT, POST PAID, FOR 5s. 6d.

"YE NARCISSUS or DAFFODYL." By PETER BARR and F. W. BURBRIDGE.

A few copies still remain of "*Ye Daffodyl*," price 1s. This is a record of the First Daffodil Conference, 1884, and contains a great deal of very interesting matter connected with the History and Literature of the Daffodil, with notes on culture and hybridisation; also a complete descriptive list of all Daffodils, ancient and modern, known up to 1884.

BARR'S INEXPENSIVE DAFFODILS.

Suitable varieties for Large Plantings and Naturalising in Woodlands, Shrubberies, Orchards, and in Grass, etc.

 Full descriptions of the following Daffodils will be found in body of catalogue.

BARR'S CHEAP MIXTURES OF DAFFODILS.

For Naturalising in Woodlands, Shrubberies, Orchards, on Grassy Slopes, etc., and for cutting.

CHOICE MIXED DAFFODILS OF MANY SORTS for naturalisation, per 1000, 35/-; per 100, 4/- FINE " " " " " " 25/-; " 3/-

PEERLESS DAFFODILS, or CHALICE-CUPPED STAR NARCISSI, Mixed (Incomparabilis, *Barrii*, and *Leedsii* varieties), for naturalisation in grass, etc. The grand effect of these light graceful Daffodils must be seen to be realised as naturalised plants. Their value as cut flowers for bouquets and vases cannot be over-estimated.....per 1000, 35/-; per 100, 4/-

TRUMPET DAFFODILS, Mixed, including *Princeps*, *King and Queen of Spain*, *Abscissus*, *Rugilobus*, *Lent Lily*, *Telamonius plenus*, etc., etc., for naturalisationper 1000, 42/-; per 100, 4/6

POET'S DAFFODILS, or SMALL-CUPPED STAR NARCISSI, in Mixture, including early flowering *Poeticus* and varieties of *Burbidgei*, for Naturalisation in grass, etc. For cutting, the flowers are greatly prized. Of these Poet's Narcissi Mr. William Robinson writes, referring to Gravetye: "Five years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissus near it, and in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture, such as one might see in an Alpine valley"

per 1000, 42/-; per 100, 4/6

BARR'S MINIATURE DAFFODILS FOR THE "ROCK GARDEN."

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the *Corbularias* (except *Corbularia monophylla*) like moisture, and should therefore be planted at the foot of the rockery. *Cyclaminus* also likes moisture and partial shade. *Corbularia monophylla* flourishes in a warm dry sheltered situation, and should be given a hot sunny nook, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) and *Juncifolius* delight in partial shade and a light gritty soil, and should be given a well-drained position such as a sloping bank. In the case of these slender dwarf-growing Miniature Daffodils, the ground may be carpeted with close-growing surface rooting plants, such as *Arenaria caspitosa*, *Thymus serpyllum* vars., *T. lanuginosus*, *Herniaria glabra*, *Mossy Saxifragas*, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. We prefer, however, seeing these little gems peeping out of grass, and where special banks are made or reserved for them we can supply seed of suitable fine dwarf grasses for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

Full descriptions will be found in body of Catalogue.

DAFFODIL SEED FOR AUTUMN SOWING.

With the exception of some of the miniature Daffodils, like *Minimus*, *Corbularias*, etc., Narcissi take 7 to 10 years to bloom from time of sowing the seed.

CHOICE MIXED Trumpet Varieties saved at our LONG DITTON NURSERIES from many choice named varieties, per pkt. 2/6.

CHOICE MIXED VARIETIES from all sections, saved at our LONG DITTON NURSERIES, per pkt. 1/- and 2/6.

Countess of Annesley, Bicolor Cabeceiras, and *Princeps*each per pkt. 3d.
Obvallaris, Proserpine, Santa Maria, Saragossa Daffodil, and Shirley Hibberd „ „ 6d.

MINIATURE DAFFODILS, flowering soon from seed—*Corbularia Citrina* (The Sulphur Hoop Petticoat) and *Triandrus Albus* (*Angel's Tears* Daffodil) and Large Early Yellow Hoop Petticoat Daffodil—all beautiful on rockworkeach per pkt. 1s.

Good Water-colour Paintings of any Daffodils can be supplied (to order) during the Daffodil flowering season at the rate of 7s. 6d. per bloom.

Orders should be given early.

Beautiful New and Rare Daffodils.

The following list of Daffodils includes some of the best of recently raised seedlings, and purchasers cannot fail to be pleased with them. In point of quality they all rank high, while a robust healthy constitution renders them additionally valuable. They will well repay a *good culture* by the size and beauty of their flowers.

For GIANT TRUMPETS we can strongly recommend *Big Ben*, *Duke of Bedford*, *Monarch*, and *Weardale Perfection*, while *Maggie May* may be termed the QUEEN OF THE LEEDSII SECTION for its size, grace, and beauty.

 The varieties marked † are suitable for pots as well as for the border.

	each.	£	s.	d.
† BIG BEN , ONE OF THE LARGEST OF TRUMPET DAFFODILS, the flowers measuring about 5 inches across, perianth primrose, trumpet yellow, of good form and substance; a strong grower and free seeder; for hybridising this should prove a valuable variety. Awarded Certificate of Merit Royal Botanic Society, 1901	10	10	0	
† BRIDESMAID (Leedsii) , <i>new</i> 1901, perianth pure white, fairly broad and campanulate, cup white, slightly margined pale primrose, large and of globular form, prettily crinkled at brim, beautiful per doz.	60/-	0	5	6
CASSANDRA (Poëticus) , a noble and gigantic Poet's Narcissus of tall and vigorous growth; flowers of fine substance, with broad wide-spreading clear white perianth, cup deeply rimmed dark red. <i>Award of Merit R.H.S.</i>	1	1	0	
CECILY HILL (Barrii) , a beautiful flower, with fine stiff perianth of a soft primrose flushed yellow at base, cup yellow, flushed orange-red, and edged cinnabar-red, late-flowering per doz.	48/-	0	10	6
CONSTELLATION (Incomparabilis) , a beautiful flower with large white perianth and bright yellow cup prettily crimped at brim, and margined orange; tall strong grower per doz.	48/-	0	4	6
† DUCHESS OF NORMANDY , <i>new</i> 1901, a very early and beautiful Trumpet-Daffodil, perianth white, fairly broad, slightly shouldered and twisting, long handsome white trumpet prettily ribbed and with open flanged mouth, delicately scented.....	0	15	0	
† DUKE OF BEDFORD (Bicolor) , a magnificent flower, measuring 4½ inches across; perianth pure white, broad and of great size, trumpet clear soft yellow, very large and of fine substance and form, measuring 2¼ inches across at the mouth; it flowers very early, opening before <i>Horsfieldii</i> , and has a pleasing fragrance. Awarded First-Class Certificates at Birmingham, Manchester, Edinburgh, and Wisbech	7	7	0	
FIRE GLOW (Incomparabilis) , perianth snow-white, cup glowing crimson, colour lasting well in the sun	1	1	0	
† GLORIA MUNDI (Incomparabilis) , a <i>glorious flower</i> with fine bold clear rich yellow perianth, large cup much expanded and very heavily stained orange-scarlet, handsome and striking, <i>extra fine</i> , strong grower. Awarded First-Class Certificates R.H.S. and Midland Daffodil Society	0	15	0	
† GLORY (Poëticus) , <i>new</i> 1901, a magnificent flower, with very large petals of great size; <i>one of the finest Poëticus varieties yet raised</i> . Awarded First-Class Certificate at Manchester, 1901	2	2	0	
† HILLSIDE DAFFODIL , a handsome rich golden-yellow early flowering Daffodil, with large broadly expanded trumpet gaufered at mouth	0	10	6	
HON. MRS. JOCELYN , <i>new</i> 1901, flower large and artistic in form, of a rich uniform golden-yellow colour, with large wingy perianth longer than the straight crown, handsome free bloomer, of good constitution	1	1	0	
† KING ALFRED , a remarkably handsome Daffodil which we can strongly recommend; flowers of large size and great substance, and of refined finish; colour a uniform clear rich golden; trumpet large and of elegant form, with open deeply frilled mouth; tall vigorous grower. <i>First-Class Certificate R.H.S., 1899</i>	6	6	0	
LADY WILLES , perianth primrose-yellow, bold yellow trumpet deeply flanged and open at mouth; a strong dwarf growing new Trumpet Daffodil	0	2	6	

Reproduced from Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Narcissus Leedsii Maggie May (syn. Edmond's White).

The largest and most beautiful Daffodil of the *Leedsii* section yet offered; flowers of great size with spreading white perianth and very large pale citron cup, beautifully frilled; a fine strong grower. *First-Class Certificate R. H. S.* and at the *Midland Daffodil Society's Show, Birmingham.* (See page 11.)

Reproduced from Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Narcissus Weardale Perfection.

One of the largest and grandest of all Daffodils, and at the same time a flower of refined beauty; it has a large white perianth and a very pale primrose trumpet of immense size. At the Midland Daffodil Society's Show, April 25th, 1900, some blooms of this Narcissus were exhibited, measuring 5 inches across, and formed a great feature of attraction. (See page 11.)

BEAUTIFUL NEW AND RARE DAFFODILS—*continued.*

	each.	£	s.	d.
† LOBSTER (<i>Incomparabilis</i>), deep yellow perianth, cup stained orange-red, which deepens in the sun; showy and handsome; tall vigorous grower, and free bloomer ...	1	1	0	
† LORD ROBERTS , <i>new</i> 1901, a grand new Trumpet Daffodil, raised at our <i>Long Ditton</i> Nurseries; flowers of enormous size, golden-yellow, with broad massive perianth and noble trumpet; tall grower and free bloomer, with strong constitution. Awarded First-Class Certificates by the R.H.S., Midland Daffodil Society, and Cornwall Daffodil Society, 1901.....	25	0	0	
† LOUISE (<i>Nelsoni</i>), a handsome flower of great substance, with broad round white perianth, and bold canary-yellow cup prettily crimped at margin, and slightly tinged orange	0	5	6	
LUCIFER (<i>Incomparabilis</i>), true (<i>raised by St. Brigid</i>), large handsome white perianth; cup an intense glowing orange-red, colour lasting well in the sun, very striking; strong grower and free bloomer. Awarded First-Class Certificates by the R.H.S. and Midland Daffodil Society, 1901	3	3	0	
† MADAME DE GRAAFF , this is one of the largest of White Trumpet Daffodils, and is a flower of delicate beauty, perianth pure white, trumpet pale primrose passing off white, strong constitution. First-Class Certificate R.H.S., and Floral Certificate at Daffodil Conference, 1896. A strong grower and free bloomer	0	12	6	
† MAGGIE MAY (<i>syn. Edmond's White</i>), the most beautiful Daffodil of the <i>Leedsii</i> section yet offered; flowers of great size, with white perianth and very large pale citron cup beautifully frilled; a fine strong grower. First-Class Certificate R.H.S.; First-Class Certificate, Birmingham (See Illustration, page 9)	12	12	0	
† MRS. MORLAND CROSFIELD , a large showy and very beautiful flower, remarkably pure in colour, with long bold clear yellow trumpet and large white perianth; it blooms as early as <i>Morfieldii</i> and is a great acquisition to the early Trumpets; a beautiful showy flower	3	3	0	
† MONARCH , a noble flower, and may truly be called the <i>Monarch</i> of all the Giant Golden Trumpeters; perianth and trumpet rich full yellow and very large, of perfect form and fine substance, growth strong and sturdy	12	12	0	
MOUNTAIN MAID (<i>Leedsii</i>), <i>new</i> 1901, broad snowy white petals, and pure white cup, flower of graceful drooping habit, beautiful	0	7	6	
PERFECTUS (<i>Nelsoni</i>), a flower of great substance and charming symmetry, having a well-formed stiff white perianth and expanded canary-yellow cup faintly tinged orange ...	0	5	6	
PHYLLIS (<i>Leedsii</i>), <i>new</i> 1901, large and beautiful, perianth white, straight canary-coloured cup, prettily fluted and flanged at brim	0	8	6	
† RAY SMITH , a uniform rich yellow Trumpet Daffodil, distinct and elegant in form, perianth gracefully twisted and tapering to a point; a strong grower with broad deep glaucous blue foliage, very handsome	0	5	6	
RED COAT (<i>Incomparabilis</i>), a remarkable variety, having an orange glow in the yellow perianth, cup orange-red, crenulated at brim; this is the first sign of a break of orange-red in the perianth of any seedling yet raised	0	15	0	
† SENTINEL (<i>Bicolor</i>), broad erect spreading perianth of a pure white, with short clear yellow trumpet, expanded and flanged at mouth, strong grower, flowers just topping the foliage; a very effective and desirable variety.....per doz. 25/-	0	2	3	
† STELLA superba (<i>Incomparabilis</i>), a grand bold flower, far superior to <i>Incomparabilis Stella</i> , flowers more than twice the size, with large clear white spreading perianth and a showy yellow cup; it is a strong grower and excellent for cutting, having a long stem. (See Illustration in 1899 Daffodil Catalogue)per 100, 42/-; per doz., 6/-	0	0	7	
THE SISTERHOOD (<i>Leedsii</i>), <i>new</i> 1901, very distinct and attractive, perianth white, cup pale buff-primrose, prettily fluted; two or three flowers on a stem	0	10	6	
WEARDALE PERFECTION , one of the largest and grandest of all Daffodils, and at the same time a flower of refined beauty; it has a large white perianth, and a very pale primrose trumpet of immense size. Awarded First-Class Certificate by the R.H.S. 1894, and the Premier Prize as being the "Finest Daffodil" at the Birmingham Narcissus Show, 1894, and Floral Certificate at the Daffodil Conference, 1896. At the Midland Daffodil Society's Show, April 25th, 1900, some blooms of this Narcissus were exhibited measuring 5 inches across. (See Illustration, page 10)	7	7	0	
† WILLIE BARR , a handsome Trumpet Daffodil, perianth clear soft yellow of fine campanulate form and good substance, trumpet rich deep yellow with elegant brim; strong sturdy grower	0	1	8	

1 Bulb each of the above-named 32 handsome New Daffodils, £92.

General List of Barr's Daffodils.

The following list of Daffodils embraces the highest class, and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. They represent the cream of our Collection (over 500 kinds), and the best of the newest varieties in commerce up to 1901, several being offered to the public for the first time this season. During the past few years we have discarded many of the older kinds which we considered had been superseded by better sorts, those which are now offered by us being really good and distinct. *Those kinds which are marked in this Catalogue "discarded," can be supplied if required.*

THE ORDER OF TIME OF FLOWERING.

The relative period of flowering of the different varieties and species out of doors we have denoted by means of numbers after the names, thus :

- (1) **1st early**, flowering from February to early March.
- (2) **2nd early**, flowering in March.
- (3) Varieties flowering in **mid-season**, or early in April.
- (4) **Late-flowering** varieties, from middle to end of April.
- (5) **Very late-flowering** varieties, opening in May.

The actual period of blooming depends upon the season and district ; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March ; but the natural rotation would remain the same.

FOR ALPHABETICAL INDEX of all the varieties offered in the following list, *see page 2 of Cover.*

 The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

 † indicates those kinds which should be selected where Daffodils are grown in pots.

 § indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass ; they are all strong growers and free bloomers.

DAFFODILS.—GROUP I.—MAGNI-CORONATI (Baker).

AJAX of Salisbury, Haworth, and Herbert, **PSEUDO-NARCISSUS** of Parkinson.

THE LARGE-CROWNED OR TRUMPET DAFFODILS, INCLUDING ALSO THE HOOP-PETTICOAT OR MEDUSA'S TRUMPET DAFFODILS (CORBULARIA OR BULBOCODIUM).

DISTINGUISHING CHARACTER.—Crown of Trumpet as long or rather longer than the perianth segments.

NARCISSUS CORBULARIA (BULBOCODIUM).

The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration. *See Cultural Notes*, pp. 3 and 4.

DAFFODILS.—GROUP II.—MEDIO-CORONATI (of Baker.)**The Chalice-Cupped Daffodils or Star Narcissi.**

QUELTIA, PHILOGYNE, GANYMEDES, ETC., OF SALISBURY, HAWORTH, AND HERBERT; PEERLESS, NONSUCH, ETC., OF PARKINSON.

The varieties of this group are hybrids, excepting *Triandrus* and *Juncifolius*, which are species. *Incomparabilis* and *Barrii* are the result of garden crosses between yellow Trumpet Daffodils and *Narcissus* *Poëticus*; *Leedsii*, a garden cross between White Trumpet Daffodils and *Poëticus*; *Backhousei* and *Nelsoni*, the result of a Trumpet Bicolor var. crossed with *Poëticus*; *Bernardi*, a natural cross between *Abscissus* (Trumpet Daffodil) and *Poëticus*; *Tridymus* is a garden hybrid between a Trumpet Daffodil and a *Tazetta* or *Polyanthus* *Narcissus*; *Macleaii*, a supposed cross between a Trumpet Bicolor var. crossed with a *Tazetta* or *Polyanthus* *Narcissus*; *Odorus*, a natural hybrid between a Trumpet Daffodil and *Narcissus* *Jonquilla*; *Biflorus* is the result of a natural cross between *Narcissus* *Tazetta* and *Poëticus*.

The varieties in this group commence flowering in March, and furnish a succession till May. They are all of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see page 4).

☞ The varieties marked thus * are not suitable for all cultivated borders, but thrive best under the shade of deciduous trees such as fruit trees, etc., or naturalised in grass in shady nooks, or on grassy slopes facing north or north-west.

NARCISSUS INCOMPARABILIS.

DISTINGUISHING CHARACTER.—Crown or cup half as long as the perianth segments, but in one or two cases three quarters as long.

The Chalice-Cupped Daffodils or Star Narcissi.

All these make charming pot-plants, while the cut flowers are of great value in decoration. For beds and borders they are very showy, and naturalised in grass few flowers are so graceful and effective. It is well to bear in mind that the depth of colouring in the cup varies according to season.

§ AUTOCRAT (3), large broad perianth full yellow, cup yellow, much expanded	per doz. each. s. d. s. d.	0 10 —

NARCISSUS BARRII.

Star Narcissi with Shortened Chalice Cup.

DISTINGUISHING CHARACTER.—Perianth segments twice or more the length of the short expanded cup or crown.

The beauty of these Narcissi renders them of great value for indoor decoration (3 or 5 bulbs in a 5-inch pot), while for beds, borders, naturalisation, and as cut flowers they are very highly prized.

CROWN PRINCE (4), perianth white, cup large and heavily stained orange-red, very large handsome flower, sturdy grower, <i>extra fine</i>		25 0... 2 3
CUPID (5), a very late bloomer, and the last of the Barrii section to flower; perianth white, cup yellow, sweet-scented		— ...3 6
† DR. FELL (1), perianth whitish, cup orange-scarlet, a valuable acquisition for pot culture under glass, being very early flowering. It is not suitable for the border, the flower-buds being so early are liable to suffer from frost. Very showy variety when forced		12 0... 1 3
† DOROTHY E. WEMYSS (5), large white perianth, with canary-yellow cup, conspicuously edged orange-scarlet, very beautiful, late flowering and a strong grower, <i>extra fine</i> . Awarded a Floral Certificate at the Daffodil Conference, 1896 , and Award of Merit R.H.S., 1901		— ...7 6
† FLORA WILSON (4), white perianth, cup deeply stained orange-scarlet, a very striking flower, <i>extra fine</i>	per 100, 33/-	4 6... 0 5
GENERAL MURRAY (3), discarded 1901. <i>Maurice Vilmorin recommended instead.</i>		
GOLDEN GEM (5), perianth rich yellow, cup edged orange, small but showy, late flowering; very free blooming, and valuable for succession	per 100, 12/6	1 9... 0 2
§ GOLDEN MARY (4), bright golden yellow, very showy, per 1000, 45/-; per 100, 5/-		0 9... —
† LADY GODIVA (4), a very pretty white sport from <i>Barrii Conspicuous</i> , having a white instead of yellow perianth		— ...2 6
† MAURICE VILMORIN (3), broad creamy white perianth, cup lemon, heavily stained orange-scarlet, very beautiful, dwarf, an exquisite flower for cutting... per 100, 25/-		3 6... 0 4
MIRIAM BARTON (3), perianth and cup soft delicate primrose, a beautiful delicate shade	per 100, 10/6	1 6... 0 2
† MRS. C. BOWLEY (4), a very striking and beautiful flower, with white perianth and glowing orange-red cup. Awarded a Floral Certificate at the Great Daffodil Conference, 1896		18 0... 1 8
† ORPHEE (2), primrose perianth, cup beautifully edged bright orange-scarlet, early flowering; a valuable cut flower	per 100, 7/6	1 3... 0 2
SENSATION (4), large pure white perianth, cup canary, conspicuously edged with orange-scarlet, beautiful, <i>extra fine</i> ; the flowers should be cut when half open to develop in water, as the fine colouring on the cup is soon destroyed with a hot sun		21 0... 2 0
SIDDINGTON (4), fine yellow petals, handsome open cup, broadly margined orange, very beautiful and remarkably free flowering, generally producing two blooms on a stem		8 6... 0 9

NARCISSUS LEEDSII.

The Silver-White Star Narcissi, or Eucharis-flowered Fragrant White Daffodils.

DISTINGUISHING CHARACTER.—Shape of flowers resembling *N. incomparabilis* and *N. Barrii* Sections, but differing in the colour of the cup or crown, which is either pure white or of a pale lemon shade passing off white.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders, and naturalised, they are most charming.

LEEDSII (2), silvery white starry flowers, *sweet-scented* ...per 1000, 30/-; per 100, 3/6
AMABILIS (2), silvery white with long cup, sometimes tinged apricot

per 1000, 55/-; per 100, 6/-
 †**BEATRICE** (3), perianth finely formed, with remarkably elegant cup. The flower is of the highest type of beauty and the purest white, *extra fine* 10 6...1 0

§**DUCHESS OF BRABANT** (3), perianth white, cup canary, a useful elegant free-flowering varietyper 1000, 25/-; per 100, 2/9 0 5... —

‡**DUCHESS OF WESTMINSTER** (4), may be called the *Queen of the Leedsii* for its finely formed handsome flowers and delicate colouring; it has a large white perianth and long soft canary cup, tinged orange on first expanding, the whole flower passing off pure white. We can strongly recommend this Daffodil for either flower-beds and borders, pots or cutting; the blooms are borne on stout stalks, and the foliage is of a beautiful glaucous blue shade. **First-Class Certificate R.H.S.** (*See Illustration in 1899 Catalogue*)per 100, 75/- 10 6...1 0

ELEGANS (3), *discarded 1901. Mrs. Langtry recommended instead.*

§**FANNY MASON** (3), perianth white, cup bright canary-yellow, pretty flower, excellent for naturalisingper 1000, 50/-; per 100, 5/6 0 10... —

†**GEM** (3), a beautifully formed flower, with white cup, of elegant form, and much imbricated silvery white perianth, *extra fine.* (*See Illustration in our 1898 Catalogue*) 21 0...2 0

‡**GRAND DUCHESS** (2), a very charming early-flowering variety, flowers of a pretty silvery white, cup stained apricot-orange; greatly valued for cutting...per 100, 55/- 7 6...0 8

***HON. MRS. BARTON** (3), large broad pure white perianth, cup expanded, and passing from primrose to white, a very distinct handsome variety, *extra fine*; a rather delicate grower on some soils, but a lovely flower where it succeeds 12 0...1 3

†**KATHERINE SPURRELL** (4), broad and overlapping white perianth of good substance, cup canary; large flower, very distinct and highest quality, *extra fine* 15 0...1 6

†**MADGE MATTHEW** (2), large white perianth, elegant white cup, *early*, foliage deep blue-green, remarkably effective in groups and masses 10 6...1 0

†**MAGGIE MAY.** *See New Daffodils, page 11*each £12 12s.

‡**M. MAGDALINE DE GRAAFF** (4), broad white perianth and much expanded primrose cup, often heavily suffused with a rich orange or terra-cotta shade; usually two-flowered, distinct, late flowering and a free grower, *extra fine*...per 100, 35/- 5 0...0 6

‡**MINNIE HUME** (3), large white perianth, cup large and spreading, passing from a fine lemon colour to white; a very handsome flower, *extra fine.* **First-Class Certificate R.H.S.**per 100, 8/6 1 3...0 2

MODESTY (new 1898) (3), long silvery white tapering perianth, drooping over and much longer than the white cup, very distinct and elegant 21 0...2 0

‡**MRS. LANGTRY** (4), perianth white and broad, with large white cup, edged bright canary-yellow, beautiful, a remarkably free bloomer, each bulb generally producing several flower stems, *extra fine.* **First-Class Certificate R.H.S.** (*See Illustration in our 1898 Catalogue*). This lovely Daffodil should be largely grown in borders and where cut flowers are in demandper 1000, 175/-; per 100, 18/6 2 9...0 3

„ „ **Extra strong selected bulbs** „ „ 230/-; „ 25/- 3 6...0 4

‡**PALMERSTON** (4), spreading white perianth, elegant canary-coloured cup, late flowering, *delightfully fragrant*per 100, 15/- 2 3...0 3

†**PRINCESS OF WALES** (4), a gem amongst white Narcissi, small starry white perianth, large spreading elegantly frilled silvery white cup, rather tall grower 10 6...1 0

SUPERBUS (3), *discarded 1901. Mrs. Langtry recommended instead.*

UNA (3), a flower of great size, with large creamy white perianth, and long straight crown, of a bright citron tinged apricot; a vigorous grower in good deep soil — ...42 0

See also New and Rare Daffodils, pages 8 to 11.

NARCISSUS MONTANUS.

Drooping Silver Star Narcissus.

MONTANUS (3), an elegant drooping flower, perianth and cup silvery white, very distinct. An interesting natural hybrid, its supposed origin being *N. poeticus* × *Moschatus*per 100, 21/- 3 0...0 4

NARCISSUS HUMEI.

Hume's Straight-Crowned Dog-Eared Daffodils.

Flowers of very distinct nodding character; garden hybrids between *Incomparabilis* × *pseudo-narcissus*; admirably adapted for beds, borders, and naturalisation.

	per doz.	each.	
	s.	d.	s. d.
HUME'S CONCOLOR (3), perianth and trumpet uniform yellow, a very remarkable flower	5	6..0	6
† HUME'S GIANT (2), perianth yellow, changing to sulphur, overhanging the large straight yellow trumpet; flower very large and remarkably characteristic...per 100, 12/6	1	9..0	2

NARCISSUS BACKHOUSEI.

Backhouse's characteristic Daffodils, with trumpet-shaped crown.

Suitable for pot culture, beds, borders, or naturalisation.

BACKHOUSEI (3), bold handsome flower with stout trumpet-shaped yellow cup, nearly equalling the length of the distinct spreading sulphury perianth.....	10	6..1	0
BORDER MAID (3), a beautiful new seedling raised by Dr. STUART, of <i>Chirnside</i> , pure white perianth of great substance, clear yellow well-formed short trumpet, a good grower, and a valuable acquisition	—	...21	0
JOSEPH LAKIN (2), sulphur perianth, yellow cup, very distinct	10	6..1	0
WOLLEY DOD (2), large spreading primrose perianth, and short deep yellow trumpet, very distinct.....	5	6..0	6
† WILLIAM WILKS (3), closely imbricated spreading primrose perianth, and striking orange-yellow trumpet, with frilled brim	2	3..0	3

NARCISSUS MACLEAIL.

† MACLEAIL (<i>Panza bicolor</i> and <i>Diomedes minor</i>) (4), flowers small, white perianth, yellow goblet-shaped cup, robust and dwarf, a charming little characteristic Daffodil, height about 4 inches	1	3..0	2
---	---	------	---

NARCISSUS NELSONI.

Nelson's Daffodils, with goblet-shaped cup and snow-white perianth.

Handsome for indoors, 3 bulbs in a 5-inch pot; beautiful in beds, borders, and for naturalisation. Being rather late flowering they are highly valued for maintaining a succession of bloom. The flowers are of great substance, with snowy white petals, and last long in water when cut.

AURANTIUS (<i>Nelson's Orange</i>) (4), broad flat white perianth, cup expanded, ribbed, and suffused more or less with orange-red, very distinct, <i>extra fine</i> . First-Class Certificate R.H.S.....	per doz.	each.	
	s.	d.	s. d.
	—	...3	6
† LOUISE . See <i>New Daffodils</i> , page 11	—	...5	6

NARCISSUS JUNCIFOLIUS.

The Miniature Rush-leaved Daffodil.

A charming and elegant little species for pots (*see page 4*) or for select spots on rockwork.

†**JUNCIFOLIUS** (4), a slender-growing dwarf species, with small graceful rich yellow per doz. each. flowers, about the size of a buttercup, with a perfectly flat little crown, height 3 to *s. d. s. d.* 4 inches, flowers delicately fragrant, a native of the Pyreneesper 100, 6/6 1 0... —

DAFFODILS.—GROUP III.—PARVI-CORONATI (Baker).

The Small-Crowned Daffodil or True Narcissus.

DISTINGUISHING CHARACTER.—Crown less than half as long as the divisions of the perianth.

In this series, *Poëticus* (the Poet's Daffodil) is the flower popularly called the **Narcissus**; *Burbidgei* is a hybrid between *Incomparabilis* and *Poëticus*, and is the connecting link between Groups II. and III. *Biflorus* is Parkinson's Primrose-Pecrless, a hybrid of *Tazetta* and *Poëticus*. *Gracilis* and *Tenuior* are the Helena of Haworth; *Jonquil* the Jonquilla of Linnæus; *Polyanthus Narcissus* the Hermione of Haworth and *Tazetta* of Sibthorp.

NARCISSUS BURBIDGEI.

Hybrid Poet's Daffodils or Star Narcissi.

These with their light and graceful habit and beautiful blossoms are much valued as pot plants (3 to 6 in a pot), and for vases, bouquets, and buttonholes; in beds and borders they are specially attractive, while naturalised in grass few plants are so beautiful.

The **Burbidgei Narcissi** differ from *N. Poëticus* in the cup of the flower being a trifle longer; the early forms commence flowering before *Poëticus ornatus*, and continue flowering in succession, one variety after another, from March to the middle of May.

		per doz.	each.	
		<i>s.</i>	<i>d.</i>	<i>s. d.</i>
§† BURBIDGEI (3), perianth clear white, cup primrose suffused and margined with cinnabar-red, <i>very early</i> and much prized for cuttingper 1000, 25/-; per 100, 2/9		0	5...	—

§ VANESSA (3), flower small but very symmetrical and attractive, clear yellow with its small cup expanded almost flat on the perianthper 100, 15/-	2	3...	0	3

NARCISSUS POËTICUS.

The Purple-ringed Poet's Daffodil or White Star Narcissus.

Poeticus divides naturally into *early*- and *late*-flowering varieties. It is from the early section, especially **Poeticus ornatus**, that Covent Garden is supplied with forced cut flowers from January to March. Early planting is specially recommended for these Poet's Daffodils.

Referring to the great beauty of these Poet's Daffodils when naturalised, Mr. William Robinson writes: "Four years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissi near it, also in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture such as one might see in an Alpine valley."

March and April Early-flowering Section.

Very beautiful for indoors, 5 bulbs in a 4- or 5-inch pot. Charming in beds and borders, while naturalised in grass they present in spring a most lovely sight.

			per doz. each.	
			s. d. s. d.	
§ ORNATUS (4), perianth pure white, broad and well formed, cup margined with scarlet, <i>very early, extra fine</i> . This beautiful early Poet's Narcissus is grown by the million for the flower markets, and is largely used in church decorations, etc.; it forces freely and is a gem for massing in grass, flower borders, etc., per 1000, 30/-; per 100, 3/6			0	6... —

SEROTINUS (5), a rare little Narcissus, blooming in autumn, flowers white with small yellow cup, borne on slender stems, ht. 10 inches 5 6...0 6

For the Large Dutch Varieties of Polyanthus Narcissus (N. Tazetta), See GENERAL BULB CATALOGUE.

No. 1.

Rd. 368/338.

No. 2.

IMPLEMENTS FOR PLANTING DAFFODILS.

No. 1. BARR'S SPECIAL BULB PLANTER.

Specially designed for planting Daffodils in grass. It lifts a clean circular little sod of grass which is released from the scoop when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been put in. By the use of BARR'S SPECIAL BULB PLANTER a large quantity of bulbs may be planted in a very short time. 10/6 each.

No. 2. BARR'S SPECIAL BULB DIBBER,

specially designed for dibbling bulbs into borders or grass, or where the ground is hard ; steel shod, with strong iron tread and cross wooden handles, 36 inches. 9/6 each.

No. 3.

No. 3. BARR'S SPECIAL BULB TROWEL,

made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel, 2/9 ea.

BARR'S SPECIAL LABELS for Daffodils, etc. See "Garden Requisites" in our General Bulb Catalogue.

SPECIAL OFFER OF

Twelve Grand Daffodils

Strongly recommended for filling Flower Beds and for Pot Culture, also to grow for Cut Bloom, or to naturalise in Grass, Woodlands, etc., etc.

Of the following Twelve Handsome Daffodils we have cultivated large stocks, knowing how highly they would be appreciated by amateurs when obtainable at a price which will allow of their being planted in quantity. All are strong growers and free bloomers, bearing showy and beautiful flowers with long stems, and will be found of great value to cut for Vases and Church Decoration, etc.

QUEEN OF SPAIN . This lovely Daffodil might fitly be called the <i>Queen of Trumpet Daffodils</i> , so graceful is its form and delicate its colouring. The flowers, which droop slightly and just rise above the blue-green foliage, are of a uniform soft delicate yellow, with very elegant trumpet slightly expanded at mouth, and the perianth flying back; as a cut bloom it is a gem, while no Daffodil is more beautiful naturalised in grass.

BARR & SONS, 11, 12 & 13 King Street, Covent Garden, LONDON.

[P. T. O.]

A LOVELY BLUE SPRING FLOWER.

MUSCARI "HEAVENLY BLUE."

THIS is without doubt the finest of the Grape or Starch Hyacinths, and one of our most valuable Spring flowers. The flower heads are large and handsome, of a brilliant true gentian-blue colour which catches the eye at a great distance. Flowering at the same time as the Daffodils, it forms a delightful contrast to their yellow shades. For naturalising on banks, rockwork, in grass, etc., this flower can be highly recommended, also for massing in beds and borders, and forming bold edgings. As a cut flower it is highly appreciated, having a delightful fragrance.

Per 1000, 60/-; per 100, 6/6; per doz., 1/-.

MANURES, SOILS, ETC., FOR DAFFODILS.

BASIC SLAG, per cwt. 10/6; per 7 lbs. 1/- (*bags free*).

GENUINE FINE CRUSHED BONES, best quality, per cwt. 14/-; per 7 lbs. 1/3 (*bags free*).

SULPHATE OF POTASH, per cwt. 21/-; per 7 lbs. 1/9 (*bags free*).

BARR'S PHYTOBROMA, for Daffodils, Hyacinths, Tulips, etc. We can confidently recommend this as a safe general manure; it should be mixed with the soil *below* the bulbs at planting time at the rate of 4 cwt. to the acre, or $1\frac{1}{2}$ oz. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given—using the same quantities.

For Pots, mix *Phytobroma* with the soil, to be used at the rate of 2 lbs. to the bushel, and in spring, when growth is showing, top dress once a fortnight, using a small teaspoonful and well mixing with surface soil. **PRICES**: 2-lb. tin, 1/-; 7 lbs. 2/6; 14 lbs. 4/6; 28 lbs. 7/6; 56 lbs. 12/6; 1 cwt. 20/- (*bags free*).

BARR'S SPECIAL MIXED POTTING SOIL, 2/6 per bushel (*bags free*).

BARR'S PREPARED COCOA FIBRE AND CHARCOAL MIXTURE, for growing bulbs in bowls, jardinets, etc. (*see page 4*). 3/6 per bushel; 1/- per peck (*bags free*).

SMALL PEBBLES, suitable for growing Daffodils and Hyacinths in, 6d. per quart; 3/6 per peck.

FANCY DECORATED JAPANESE BOWLS, suitable for growing Daffodils in:—
5 in. diameter. -/10; 6 in. dia. 1/3; 7 in. dia. 1/9; 8½ in. dia. 3/-; 9½ in. dia. 4/-; 10½ in. dia. 6/-;
12 in. dia. 8/6 each.

Daffodil Notices.

**Our Nurseries,
Long Ditton.**

Visitors invited during Spring to see our magnificent collection of Daffodils in bloom. The nurseries are situated within a mile of **Surbiton Station** on the London and South-Western Railway. Cabs are always to be had at Surbiton Station.

**Cut Daffodil
Flowers.**

When in bloom out-of-doors, cut specimens of Daffodils, correctly named, we forward post-paid at a moderate charge, to cover attendant expenses, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of Spring. If a list of the varieties possessed by the sender is enclosed, such sorts will be omitted. *A remittance should accompany the order.*

1 flower each of 12 sorts, 1/6; 1 each of 25 sorts, 3/6; 1 each of 50 sorts, 6/-
3 flowers „ 12 „ 3/-; 3 „ 25 „ 5/6; 3 „ 50 „ 10/6

Cut Daffodil Flowers (without names) in variety, for decoration, 4/6, 5/6 & 7/6 per 100.

**Naming
Daffodils.
Daffodil
Prizes.**

Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 2s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Long Ditton, Surrey.

Particulars of **Competitions, Spring 1902**, for Barr's Silver Daffodil Cups, will be sent on application.

Notices to Our Foreign and Colonial Correspondents.

**Prepayment
necessary.**

Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an "order to pay"* on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

**Particulars of
Freight.**

Australia and New Zealand, per Parcel Post at 6d. per lb. (1s. being charged for the first lb.), or per "Eastern Express," at 6d. per lb. (minimum 2s.) We recommend the Parcel Post to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without any additional charges.

India.—Seeds and Bulbs can be despatched to all postal towns in India, by Parcel Post at the rate of 1 lb. for 1s.; 2 lbs. for 1s. 8d.; 3 lbs. 2s. 4d.; 7 lbs. 3s. 6d.; 11 lbs. 5s.; or by "Eastern Express," at 6d. per lb. up to 30 lbs., after 30 lbs. cheaper as cargo.

Shipping, etc.

In Shipping Bulbs and Plants to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.
